

Dear Sir/Madam,

I am writing to express my interest in the Research Assistant position at Green University of Bangladesh. I recently completed my Bachelor of Science in Computer Science and Engineering with a major in Artificial Intelligence from Bangladesh University of Business and Technology (BUBT).

My academic interests mainly focus on computer vision, deep learning, medical image analysis, and explainable AI. I am also actively exploring recent advancements in Large Language Models (LLMs) and Vision-Language Models (VLMs), and I am eager to expand my knowledge through research and practical implementation. During my undergraduate studies, I worked on multiple research-oriented projects related to image classification and skin cancer diagnosis using CNNs and Vision Transformers. I also have an accepted conference paper at IEEE QPAIN 2026 titled "Comparative Analysis of Transformer and U-Net-Based Architectures for Skin Lesion Segmentation," and I am currently preparing another manuscript related to interpretable deep learning approaches for skin cancer diagnosis.

Through these experiences, I developed familiarity with experimental evaluation, dataset preprocessing, model comparison, and research documentation. I enjoy reading research papers, exploring recent developments in AI, and learning through practical implementation and experimentation. I am also comfortable working collaboratively in team environments and value continuous learning and constructive feedback.

I am highly motivated to join as a Research Assistant because I want to further strengthen my research skills and contribute to meaningful academic and research activities under experienced faculty members. I believe this opportunity would help me grow both technically and academically while allowing me to contribute sincerely to ongoing research work.

Thank you for your time and consideration. I would be grateful for the opportunity to be considered for the position.

Sincerely,
Mahmudul Hasan Shiblee
